

Argha Nandy

Brief Biography

Argha was born and brought up in Kolkata. At the age of 22 after finishing his B.Tech in Biotechnology from Kolkata, he decided to pursue research as a career and left for the UK to pursue an MSc in Bioengineering at the University of Sheffield. For a few years he then worked as a research assistant in Oncology after which he moved to Ireland to pursue his PhD research (ongoing) in Biochemistry at the National University of Ireland Galway (NUIG). His current research focuses on Drug discovery-based approach towards the treatment of breast cancer.

Argha believes that sharing real life stories are one of the most valuable platforms of learning; something even more valuable than knowledge gained from a book. He has mentored many undergraduate students during his PhD at the NUIG, trying to develop their skills to become successful researchers. Argha was introduced to the FEA by his friend Sanjib Guha. He wants to keep continuing to reach out to the young minds who are the future of this bright and beautiful world. FEA to him is one such fascinating platforms by which he can nurture the next-generation of young talents to which the world looks up to.
