

Harinder Singh

Harinder Singh was born in Mumbai and grew up in the East, West and North India due to the Military job of his father. He was always interested in Science and how everything works and thus ended up becoming a scientist. He likes to go hiking, camping, and other outdoor activities, indoors he plays a lot of Xbox games.

Currently, he is a Staff Scientist in the Infectious Disease Department at the J. Craig Venter Institute (JCVI) and staying in the Washington DC metropolitan area. Harinder got his Ph.D. at Bioinformatics Centre in the CSIR-Institute of Microbial Technology, Chandigarh, India. During his Ph.D. he developed methods for the analysis and prediction of protein structure and also works in immunoinformatics. At JCVI he is studying the role of the microbiome in the context of various human diseases including diabetes, leukemia, UTI etc.
