

Mohinder graduated as a Master of Science in Engineering, with specialization in Process Control, from Boston University and received his Bachelors of Technology from Indian Institute of Technology (IIT). Besides engineering and entrepreneurship, Mohinder's passions are sports (Field Hockey), Hiking and helping startups. Mohinder is a sportsperson turned engineer, having done his schooling at sports school Rai in Haryana. He currently lives in Fremont California, with his wife and three children.

Mohinder (Ray ) Sikka is founder and CEO of [Sensitel](#) Inc., a silicon valley based company helping transform last-mile delivery logistics using real time sensor data from vehicles and cities. Prior to founding Sensitel, Ray held senior leadership positions with Naturipe Farms, a CPG company, OpSec Security, a provider of anti-counterfeiting solutions and i2 Technologies, a supply chain software company acquired by JDA Software. Over his career, Mohinder has brought multiple innovations to market such as Automotive News PACE Award winning vehicle-sequencing solution, mill-scheduling solution for steel and paper industries and RFID infrastructure software.

Mohinder is a founding member of [RFID Security Alliance](#) and a member of [Bio-Supply Risk Management Committee](#). Active in his alumni community, Mohinder is an organizer for the IIT Conference in Bay area and is a champion for IIT startups.

Some of Mohinder's views on AI and IoT technologies are shared in this [podcast](#).
