

## **Onisha Patel**

Onisha Patel was brought up in Ahmedabad, Gujarat. After finishing undergraduate studies in Biochemistry, she moved to Australia for further education. She did a Graduate Diploma in Biotechnology followed by a PhD at RMIT University. She now works as a structural biologist and uses nobel prize winning techniques like X-ray crystallography and Cryo-electronmicroscopy to visualise and understand proteins that are important in health and disease. Apart from science, she is also very passionate about art and have participated in various events, exhibitions that bring science and art together. She enjoys drawing/painting and yoga.
