

Greetings!!

I am Shubham Bansal, born in UP and lived in Delhi-NCR for most of my life. I am Automotive Engineer by profession and works as a researcher and developer for new gasoline engines. I had pursued my B. Tech in Mechanical engineering and M. Tech in Automobile engineering from Amity University Noida. I am currently working with AVL Technical Centre, Gurgaon as a Gasoline development engineer.

As the part of job, my area of focus lies mainly with the engines and powertrain of the vehicle. I am responsible for developing new engines and vehicles in order to meet the emission guidelines of the particular nation. It also involves researching, developing and testing new technologies in order to meet the required guidelines and limits for emissions. I have worked for many leading car manufacturers including VW, TATA, JLR, Audi, Skoda, Renault and many more. Earlier, I used to work for FEV India Pvt Ltd, Pune, where my area of focus was more of similar as it is AVL India.

Apart from academic and professional world, I enjoy outdoor sports and have represented my school at various state level competitions in various games. I have keen interest artistic work like drawing, art & crafts and love to spend time in Photography and photo editing. I am a Motorsport enthusiast and have been part of many National and International races, including Formula 1, as the track marshal. During my days in Pune, I enjoyed trekking and hiking and had led many hiking groups at that time.
