
Profile

Suchita Nair was born and brought up in Vadodara, Gujarat, India. Suchita is an aspiring student of science and technology from her childhood and firmly believes learning never stops. Logic and mathematics being her favorite subjects she decided to pursue Computer Science when she graduated from high school. Besides leading a career in Computer Science, Suchita is passionate about cooking, ceramics, various crafts, gardening and traveling. She is married to Abhijeet Pande who works as an Energy Efficiency consultant. They live in Kensington, California and have lovely 6-year-old daughter.

Educational & Professional Experience

Suchita holds a Bachelor of Engineering degree in Computer Science from Maharaja Sayajirao University, Vadodara, Gujarat. She wanted to advance her knowledge in the field of Computer Science and pursued her Master of Science degree at Clemson University in the United States. During her Master's program, she developed a deep interest in software engineering as a discipline to build highly scalable, performant and resilient distributed services architecture. She started her career as a software engineer at Sun Microsystems working on streaming video and high bandwidth broadcast systems. She then joined Macromedia Inc., as a senior Computer Scientist to work on scaling their services backend to support millions of subscribers to deliver content on Flash based mobile apps. She is now an engineering manager leading a team at Adobe Systems to help build micro-services for Adobe's Enterprise customers.

Suchita is passionate about influencing the youth in the field of technology and science and volunteered her time last year teaching twenty high school girls programming as part of the [Girls Who Code](http://blogs.adobe.com/adobelife/2017/09/06/who-runs-the-world-girls-who-code/) summer immersion program.
